

Society for Range Management
Monograph Submission and Approval Process
8/19/2012

1. Submit completed monograph to the Society for Range Management (SRM) Outreach and Communication (O&C) Committee Chair for review.
2. Committee Chair will present to the committee membership for consideration for review.
3. If the monograph manuscript has been sent out for external review and is accepted by the committee, one additional review will be sought by the committee to make sure the manuscript is consistent with the professional standards of the SRM.
4. In the case that the monograph manuscript has not received independent review and is accepted by the committee, three expert reviews will be sought by the committee to make sure the content is appropriate and that it also meets the professional standards of the SRM.
5. Reviews will be passed along to the authors of the monograph to be incorporated and addressed. Once this review process has been completed and all reviewers and the O&C committee are happy with the resulting monograph it will be submitted to the Board of Directors (BOD) representative.
6. The BOD representative will present it to the BOD for their acceptance of the final monograph.
7. Once the BOD had accepted the monograph a PDF copy of the monograph will be placed on the SRM website and it will be announced in the newsletter and in a Rangeflash to the membership.
