

Colorado Section of the Society for Range Management Colorado Chapter of the Soil & Water Conservation Society Technical Field Day

June 4th & 5th 2020

**EXCELLENCE IN
RANGELAND
CONSERVATION
AWARD**
SOCIETY FOR RANGE MANAGEMENT

On Day one we will tour the **3R Ranch** owned and operated by Reeves and Betsy Brown. During the tour we will discuss how the Holistic Resource Management© model provides the guidelines for the range management philosophy of the Browns; the benefits of their 65 paddocks, grazing management, rangeland/soil health, brush management, and pasture management. We will also look at the irrigation and management improvements they've made.

On Day two we will visit the Pueblo Mountain Park. There we will organize a plant workshop. From identification characteristics to their role in the ecosystem, as well as best management practices for these species and landscapes.

*Over Night Camping Available
