

Ecology II Course Student Presentations

Tuesday, February 18th 9:50-11:45 Room: Denver
Society for Range Management Conference

Rangeland Ecology II is an online project-based course that teaches participants how to find, evaluate, and utilize peer-reviewed literature and other credible resources to deepen understanding of site-specific ecological processes and develop plans to meet land management objectives and address issues.

Presenters:

Karen Clause, Rangeland Management Specialist

Restoration Pathways for Mountain Big Sagebrush in the Upper Green River Basin

Marji Patz, Rangeland Management & Ecological Site Specialist

Greasewood Response to Shifting Channel Dynamics

Scott Woodall, Rangeland Management Specialist

Arizona Ponderosa Pine Savanna Shift to Tree Dominated State: Assessment and Restoration Alternatives

Kendra Moseley, Ecological Site Regional Specialist

Ecological Site Concept: How should it be defined and described to improve the STM and ESD for land management?

Tony Garcia, Rangeland Management Specialist & Data Collection Coordinator Central Remote Sensing Lab

Inventorying and monitoring rangeland ecosystem health and productivity using remote sensing

Carrie-Ann Houdeshell, Soil Scientist/ West Region Modeling Unit Coordinator

Development of a Rangeland In-Field Soil Health Assessment Worksheet

Organizers & Questions: Johanna Pate (Johanna.Pate@usda.gov), Yvette Gibson (Yvette.Gibson@oregonstate.edu), & Pat Shaver (Pat.Shaver@oregonstate.edu)
